We are delighted to announce that Cognitive Credit has joined our Partner Programme as an ELFA Specialist partner to help inform our members on credit data strategy.

Cognitive Credit provides the world's leading credit investors with specialist data and analytics to form smarter, faster credit views.

Cognitive Credit deliver detailed credit models automatically updated within minutes of earnings release, paired with workflow tools that elevate investors productivity and empower teams to develop more actionable investment ideas – quicker than ever before. With an ever-growing coverage universe that now spans over 1,900 issuers in US and European Investment Grade Bond, High Yield Bond, and Leveraged Loan markets.

By way of introduction, Cognitive Credit are sharing their most recent Quarterly Earnings Summaries, which the covers the key market and sector trends across US and European bond markets – all made possible by the fundamental data processed by their proprietary machine-reading technology. To read these summaries by market, follow the links below:

- 2Q24 European Quarterly Earnings Summary

- 2Q24 US Quarterly Earnings Summary

Our partners help keep our members at the cutting edge of trends in the leveraged finance market including covenants, restructurings and legal and regulatory developments through ELFA Seminar Series events and webinars, reports and Partner resources.
